

Turn-Key Environmental Consultants, Inc. is a full service environmental consulting organization. We specialize in Indoor Air Quality testing, including mold investigations and remedial design, Asbestos related services, Site Assessments, groundwater testing as well as remediation design and management, and EPA/OSHA compliance services. We provide practical solutions utilizing diversified scientific strategies to solve environmental challenges faced by our clients. We identify hazards and potential liabilities through our site investigations, hazard assessments and project management services.

We also offer services to help our clients comply with new and existing environmental and safety regulations. This includes: conducting periodic audits, completing annual permitting requirements and groundwater monitoring programs. We pride ourselves in providing cost effective, common sense approaches to environmental and safety challenges faced by our clients. Our knowledge of the regulations, contacts within the industry, and understanding of regulatory procedures insures that our clients are being fairly treated by regulators. We aspire to become partners with our clients and have established ourselves as a single source of technical knowledge and expertise.

TURN-KEY ENVIRONMENTAL CONSULTANTS, INC.

Turn-Key is a group of highly trained scientists with experience in solving complex environmental and safety problems from indoor air complaints to OSHA compliance to ground water remediation. Customers have included residential and commercial properties, including schools, universities, insurance companies, realtors, manufacturers, and hospitals.
